

April 2008 ASIS Meeting

Technical Security Counter Measures (TSCM) - Sweeping for Bugging Devices in the Workplace

When: Wednesday, April 16
Time: 8:00 am to 9:30 am
Where: Suby, Von Haden & Associates
1221 John Q. Hammons Drive, Madison

Speaker: Burt Boldebuck
President, BOLDTRONICS, INC. (BTI)
Madison

Since 1990, Burt has operated Boldtronics, Inc.(BTI) in Madison, WI. BTI's services are primarily focused on video surveillance and card access control systems designs, sales, installations, and service.

Burt has over 30 years of experience in corporate security, private security, and law enforcement. In 1998, a division of the company was created called **BTI**, which specializes in high end Technical Security Counter Measures (TSCM) services for the sweeping and detection of electronic "Bugging Devices" in the commercial, government, and private settings. Since 1999, Burt has been a part-time instructor for a specialized government training program at State of Wisconsin Technical College. This program specializes in the instruction of Video and Electronic Surveillance Operations for US Military and Federal Government personnel.

Next Meeting Joint Chapter Workshop

Central Wisconsin Chapter 067, Greater Milwaukee Chapter 053, Fox Valley Chapter 083

Date: May 22, 2008 **Time:** 8:00 am
Location: Country Springs Conference Center
2810 Golf Road, Pewaukee

Newsletter Chair Message

By: Cindy Bong

Spring is here – or at least well on its way! As I'm sitting in my office today the sun is shining, the weather forecasters are calling for temperatures in the low 60's and the snow is gone or rapidly disappearing - except for those nasty snow piles left from plowing parking lots and snow left in the heavily shaded areas.

My company, SVA, is closing in on the end of another busy but successful tax season and I'm contemplating the daunting task of budgeting for our next fiscal year. A significant portion of our budget dollars is spent on salaries of employees, information technology systems, and telecommunications. We are a service business, as many of your companies are. There is a high priority on safeguarding our client information, as well as our employees' safety. With those thoughts in mind, I am looking forward to being exposed to a new subject matter for me—technical security counter measures, which is this month's program presented by Burt Boldebuck. The wonderful thing about being a member of ASIS is the exposure to experts in their respective fields of security. I'm not sure if I would have the opportunity to meet many of you, or have the benefit of many of you sharing your knowledge with me without this membership. Thank you, I have benefitted both personally and corporately!

William Lynch has graciously offered his biography for this issue as we strive to get to know our members and tap into their areas of expertise. Our members serve as a resource to us – another benefit of being an ASIS member. Thank you Bill!

Next month's bio page is open – we're waiting for you to share your expertise with our members. Please submit your biographical information prior to May 1st.

I'll see you on April 16th at the SVA office.

Feature Bio

William Lynch, CPP

First, let me start with the important information. My lovely wife, Brenda, and I have been married for over 35 years. Together we have raised three great children, now all adults and out on their own. We also have a beautiful, smart and happy three year old granddaughter who is visiting with us and bringing untold amounts of joy into our lives as I write this. I hunt, fish, shoot, read, and do a lot of other things for entertainment. It's a rare occasion that finds me bored.

I have BS and MS degrees in Criminal Justice. The MS includes an emphasis in Education. In December 2006 I retired with 32 years of service at Oscar Mayer/Kraft Foods. I enjoyed a very interesting career there as the Protective Services Manager and Associate Safety Manager.

In 1978 I became a member of the American Society for Industrial Security, now officially named ASIS, International. In 1982 I was first certified as a CPP and recertified continually until being awarded a lifetime certification in 2007. Also in 2007 I was made a life member of ASIS International. In the 80's and 90's I was a very active participant in ASIS, serving several terms in volunteer leadership positions with the Central Wisconsin Chapter, chairing, and otherwise serving on many committees and participating in many chapter activities and projects. For the last several years I have taken a less active role in chapter business. Then one day, not too long ago, someone said there was a need, and, perhaps foolishly, I said OK, and ended up in another volunteer leadership role, this time as Assistant Regional Vice President. I'll do my best to help out and support the Central Wisconsin and Greater Milwaukee Chapters.

I have retired from Oscar Mayer, but I have not retired from security. For several years while at Oscar Mayer I augmented my professional experiences by teaching as an adjunct (part-time) faculty member at the college and university level, most recently for a four-year stretch at the University of Wisconsin at Platteville. I very much enjoy teaching and the feeling that I was able to bring some fresh, firsthand knowledge and experience to the students. When one is reviewing the textbooks and source materials for an upcoming lecture it is amazing how the experiences of a lifetime can breathe life into the topic matter. Much of what we do is truly fascinating – just listen to your colleagues' stories at the chapter meetings. In addition to teaching, I have organized a small business (W J Lynch LLC) engaged in various activities employing the talents and knowledge I have accumulated over these past years.

One thing I know is that whether going by the name American Society for Industrial Security or ASIS, International, I owe much of my professional development, much of my career achievements, and much of my personal satisfaction to my participation in this truly professional organization.

Career Expo 2008 Registration Form

Wednesday, April 9, 2008
10:30 am to 1:30 pm on campus
Set-up time begins at 10:00 am

Company name: _____

Chapter, #67

A Comprehensive Set of Workplace Tools

Every business leader understands the need to keep up with the pace of technological change. Whether your organization is big or small, security technology plays a role in maintaining your competitive advantage. Organizations that effectively learn how to match technology to security risks will balance the impact on their bottom line.

Who Should Attend This Seminar?

- Security and Loss Prevention Professionals
- Investigative Supervisors
- Information Systems Administrators
- Safety and Risk Specialists
- Human Resource Managers
- Purchasing Directors
- Financial Decision Makers
- Senior Organization Leaders

In other words – EVERYONE in your organization who has responsibility for emergency preparedness and security technology and its impact on your business and employees.

Why You Should Attend This Seminar:

- To gain insight into current security/safety technology
- To learn how security/notification systems can benefit the workplace
- To understand the importance of applying appropriate technology to the business risks

If you are accountable for the security resources of your company – **THIS PROGRAM WILL IDENTIFY CRITICAL ISSUES AND PROVIDE VALUABLE TOOLS FOR MAKING SOUND CHOICES FOR YOUR ORGANIZATION.**

Program Agenda

May 22, 2008
Country Springs Hotel
8:00 am to 4:30 pm

Keynote Sessions

Representative Joan Ballweg:

Rep. Ballweg is a member of the Wisconsin Standing Committees on DHS and Emergency Preparedness. She will discuss a review of 2007-2008 legislative work on Emergency Preparedness.

Mary Pfeil (Senior Director of University Communication at Marquette University) will present: **When All Hell Breaks Loose: The Importance of Communication in Crisis Situations**

Breakout Sessions

- Mass Notification critical elements
- A new look at School security
- Low-Tech Terrorism – Shootings as a terrorist tactic
- Physical Security Strategies
- Business Continuity
- Mass Communication System Design
- Solving the Mass Communication Issue
- Visitor Management for Emergency Notification
